Executive Summary

Your website https://cloudzentra.in/ appears to have **very low public discoverability / indexing visibility** right now. Search engines did not return meaningful direct results for the domain during testing, which often indicates one or more of these issues:

- Website not indexed properly
- SEO metadata missing
- robots.txt blocking crawlers
- New website with no crawl history
- SSL / DNS / performance issues
- Limited public content or inaccessible rendering (JS-heavy app)

Full QA Test Report (As Professional QA Would Do)

1. Domain / Accessibility Test

Test Case	Expected Result	Status	Observation
Domain resolves	Websites are opens globally	⚠️ Needs Live Validation	Search visibility weak
HTTPS SSL	Secure certificate active	⚠️ Verify	Needs browser validation
Redirect HTTP→HTTPS	Auto secure redirect	⚠️ Unknown	Should confirm
WWW/non-WWW consistency	One canonical version	⚠️ Unknown	Needs test

Recommendation:

- Ensure:
    - http://cloudzentra.in → https://cloudzentra.in
    - www.cloudzentra.in → https://cloudzentra.in

---

2. SEO Testing

Check	Status	Notes
Indexed in Google	❌ Weak	Not discoverable in search
Meta Title	⚠️ Unknown	Must exist on all pages
Meta Description	⚠️ Unknown	Needed for CTR
Sitemap.xml	⚠️ Verify	Important
robots.txt	⚠️ Verify	Must allow crawling
Canonical Tags	⚠️ Verify	Avoid duplicates
Open Graph Tags	⚠️ Verify	Social share previews

High Priority Fix:

Search visibility is currently poor.

---

3. UI / UX QA Checklist

Area	What Should Be There
Header	Clean logo, nav menu, CTA button
Hero Section	Clear headline + value proposition
Mobile Responsive	Perfect on phone
CTA Buttons	Contact / Demo / Get Started
Footer	Contact, privacy, social links
Loading Speed	Under 3 sec

Common Bugs to Check:

- Text overlapping mobile
- Broken buttons

- Misaligned forms
- Tiny fonts
- Color contrast issues

---

4. Functional Testing

Forms

Test Case	Expected
Contact form submit	Success message
Invalid email	Validation shown
Empty fields	Required errors
Spam prevention	CAPTCHA / honeypot

Navigation

Test	Expected
Menu links	Open correct pages
Broken links	None
Back button	Works

---

5. Security QA

Check	Required
HTTPS SSL	Yes
Form sanitization	Yes
SQL Injection protection	Yes
XSS prevention	Yes

Check	Required
Hidden admin exposed?	No
Security headers	CSP / HSTS / X-Frame

---

6. Performance QA

Use tools:

- Google PageSpeed Insights
- GTMetrix
- Lighthouse

Target Scores

Metric	Goal
Mobile Speed	85+
Desktop	90+
CLS	<0.1
LCP	<2.5 sec

---

7. Browser Compatibility

Must test:

- Chrome
- Safari
- Firefox
- Edge
- Android Chrome
- iPhone Safari

Critical Issues Found (Priority Order)

🔴 **P1 Critical**

1. Poor search engine visibility
2. Possible indexing issue
3. Unknown SSL / redirect validation

🟠 **P2 Important**

4. Need responsive mobile QA
5. Need speed optimization
6. Need form validation tests

🟡 **P3 Nice to Improve**

7. Better CTA funnel
8. Analytics tracking
9. Social preview tags

Professional QA Recommendation

Immediate Actions (Today)

Technical

- Add Google Search Console
- Submit sitemap.xml
- Check robots.txt
- Fix indexing

UX

- Add strong homepage CTA
- Improve trust signals
- Add testimonials

Speed

- Compress images
- CDN
- Lazy load
